Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation of environmental permits A and B referred to in the status logs below and the replacement of those permits with a consolidated environmental permit.

This consolidated permit has been issued to address an issue which has come to light after the consolidation of 28 Standard Rules Permits into 8 on 8th December 2025. Previous to this the operator held two standard rules permits for different activities. However, after the consolidation, both permits became an SR2022 No4.

We have consolidated EPR/HB3507SS and EPR/HB3507TL as the activities the operator currently carries out and the waste quantities on both permits are covered within one SR2022 No4.

In addition, the operator has applied to extend the permit boundary during this consolidation.

The schedules specify the changes made to the permit.

We consider that in reaching our decision to grant a permit/vary the permit we have taken into account all relevant considerations and legal requirements.

We are satisfied that the permit will ensure that a high level of protection is provided for the environment and human health and that the activities will not give rise to any significant pollution of the environment or harm to human health.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
